CLIENTS

LIZ

BRANDING/MARKETING FOLIO:

I went to her looking to build a photo library that authentically embodied my new business brand. She helps you understand your vision and desires, to make sure she encapsulates the look and feel you are going for.

She made the portrait process feel comfortable and not awkward and gave great guidance and direction to get the shots I wanted. She was encouraging, supportive, and energetic contributing to a wonderful multi-day shoot experience, and we both had fun!

She captured many excellent moments of laughter, happiness, connection, advice, and dynamic movement which are integral in telling the story of my physical therapy and wellness business.

Lauren S., PT, DPT

HEADSHOTS/PORTRAITS:

Liz Stubbs is by far the best photographer I've ever had the pleasure to work with. She listens to what you're after, makes suggestions and choices that are in keeping with your goals, and absolutely over delivers. I've never come away from a photo session with so many viable options and beautiful shots. If you're looking for amazing results and diverse imagery, Liz is the best. I couldn't recommend her any more highly!

Dan R., actor/artist

"OMG these are just amazing and you make me feel so happy! I love how you see my true self through your lens. Every time I look at these, the self criticism fades away to self love. Is there a better gift in this life?!"

Penny T., artist

STYLING TIPS

WARDROBE

Wear what boosts feeling your YES in our shoot! Go into your closet 2 nights before and see what speaks to you. (If it needs pressing or spot cleaning, you have time to do that without last minute rushing.)

Solids + Patterns: Typically we look better without overwhelming prints, florals or tiny patterns that might be distracting. BUT if patterns are your YES, bring them as options along with some solids.

Colors: Bring tones & colors you love. Jewel tones, saturated colors create a rich and dynamic feel in portraits. A variety with both light & dark broadens the range of looks we capture.

Neckline: Varying your neckline with your selections is strategic. The 3 most flattering necklines are: V-neck (which we can also create with a draped scarf), oval and straight across boatneck lines show off shoulders.

Sensitivities: If you have areas you are sensitive to, please let me know. We can light + pose to optimize all areas. For example, if upper arms are a concern, think about sleeve choices or wraps. Accent pieces like scarves can also draw our focus.

Textures: Bring layers & accessory options to easily vary looks: scarves, jackets, sweaters. Varied textures play well on camera: contrasting nubby with smooth, leather with fabric, etc. Scarves with a little bit of shimmer or a light gauzy weight are lovely.

Tailoring: All body shapes are flattered by clothes tailored to fit. Jackets or tops in particular are great tailored options.

Happy Feet: Bring comfy shoes as well as snazzier options for full-body images.

Play: If you want to wear a freestyling look that feels fun, do it! Bring what feels like a YES for you. We can always add a JUST-For-YOU portrait even if it would not be in your professional looks portfolio. How do you feel your truest?

Signature Items: What details are your signature items (funky socks, cufflinks, belt, jewelry)? We'll capture those in detail shots designed around those pieces.

Jewelry: Wear what you feel best in. Simpler is better. We may edit once we see the full look together.

Iconic Tools: If there are any tools of the trade that speak to your profession + passion, we'll layer those in to some of your portraits.

MAKEUP

My general recommendation: **minimal is best**. Particularly as we advance into wiser years, minimal makeup that enhances your features is most flattering. Perhaps bring attention to eyes and lips.

All images are gently retouched with attention to eye clarity, smoothing skin textures, and whitening teeth.

LIZ STUBBS

I am a heart-led photographer + creative whose passion is creating empowering portraits for the camera-show.

When we step into our own light, we shift how we see ourselves, & we bloom, transforming how we show up in life.

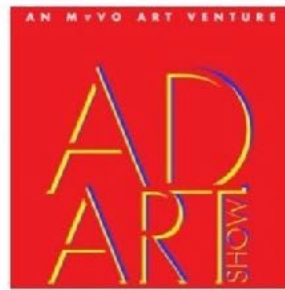

Don't be a watered-down version of you. Be a new vision. Be YOUR vision.

See your WOW in portraits!
